

Automated Valuation Model featured agents

OnTheMarket's recently launched Automated Valuation Model (AVM) is now live on site and features across our advertising.*

We've made limited branding opportunities available to our agents within the AVM, which means that **your brand** can feature on the same page as the valuation result returned to the consumer.

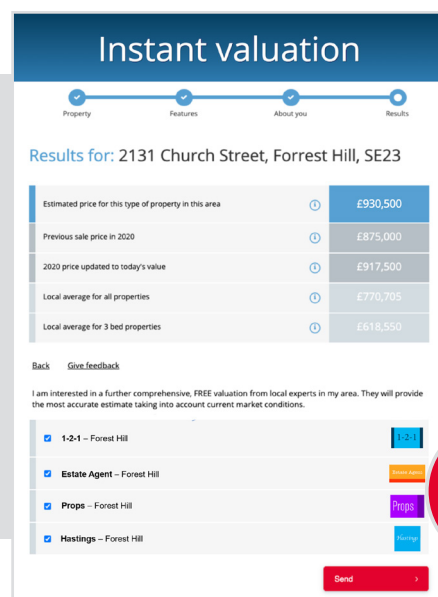

Agents will currently be able to purchase **one of four agent valuation spots** on any relevant outcode where their business operates.

Features

Your logo is displayed prominently after a user has submitted an instant valuation and will currently be 1 of 4 agents promoted to offer an expert valuation in a specific area.

The spots are on rotation ensuring each agent receives the opportunity to be seen first on the list.

Valuation requests are sent directly to your inbox.

Instant valuation

Property Features About you Results

How do they work?

- You can buy spots by outcode where your branch is located, or where you have a minimum of 5 properties for sale.
- When a user has requested an instant valuation at OnTheMarket they will be offered the opportunity to contact the 4 promoted local agents to arrange an expert valuation.
- Once a space is purchased it is yours until you no longer require it.
- With just 4 spots currently available, there is limited availability and therefore when they are gone, they're gone!
- Minimum contract length is 3 months and rolling thereafter.
- Please note, the Automated Valuation Model tool is not currently available on the OnTheMarket app.

*Valuations provided independently by Property Price Advice in association with OnTheMarket. These results are not provided by OnTheMarket and are only indicative based on information provided.
