

# Property alert banners

A Property alert banner campaign gives you the benefit of showcasing your brand and message to a valuable audience of property-seekers who are searching in your local area and have registered to receive property alerts from OnTheMarket when new relevant properties come onto the portal.

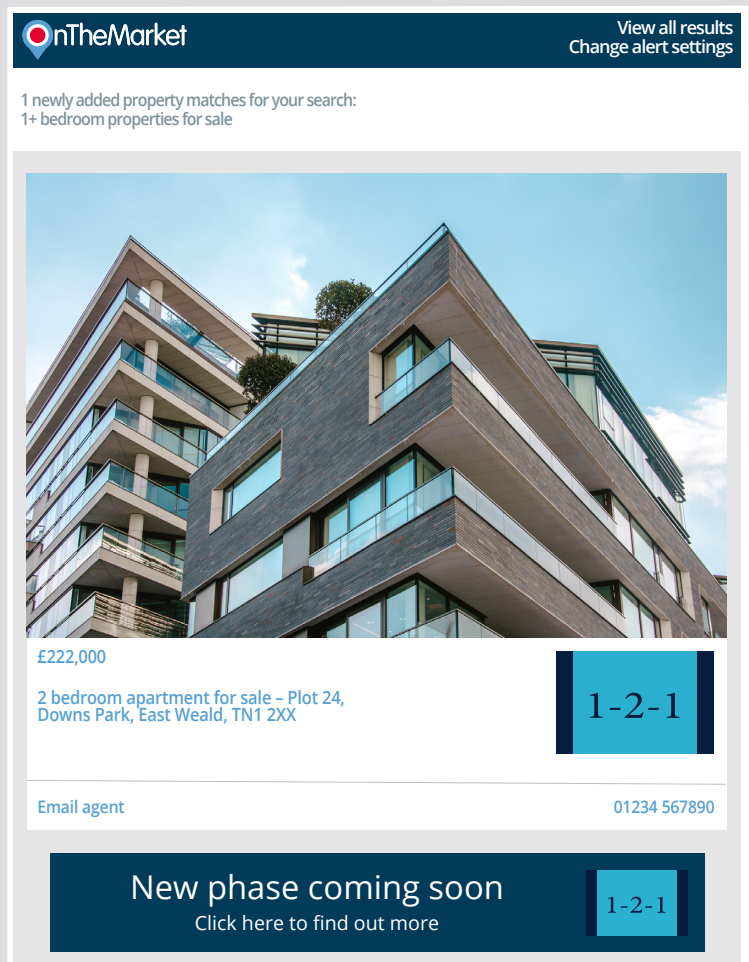

## Features

Your banner will appear on emails sent to OnTheMarket customers who have asked that we alert them to new properties. It is a highly targeted audience.

These individuals are active property-seekers and the property alerts provide a great opportunity for you to put your brand in front of them.

The banner can be changed monthly to keep your message fresh.

Only one banner will appear on each email to ensure focused exposure of your brand and offering.

## How do they work?

 You can choose how many email alerts you would like your brand to appear on each month (in multiples of 1,000). It is a monthly contract for an initial minimum period of three months.

 Banner creatives should be provided in the following size:

- Email: 575(w) x 102(h) pixels in JPEG format and no larger than 64kb
